ACADEMIC OBJECTIVE

Interdisciplinary science undergraduate training in Physics, Chemistry, Biology, and Mathematics. Interested in developing a strong foundation in Physics. Seeking to build experience in academic and research internships to build experience in quantitative analysis, computational methods, and experimental science.

EDUCATION

Bachelor of Science (B.Sc) – Blended Science

Physics, Chemistry, Biology, Mathematics

University of Madras

2nd Year Undergraduate

Planned specialization: Physics (Final Year)

TECHNICAL & ACADEMIC SKILLS

- **Programming & Computation:** Python (scientific computing, basics of data analysis)
- **Laboratory Skills:** Basic laboratory techniques in physics, chemistry, and biology
- **Instrumentation:** Telescope handling and observational basics
- **AI & Emerging Tech:** Generative AI (certified course)
- **Electronics & Hardware:** ESP32 microcontroller (ongoing project work)

PROJECTS & ACADEMIC WORK

- **ESP32 Mini Rover (Ongoing Project)**
 - Working on a microcontroller-based rover using ESP32
 - Focus on hardware integration, basic programming, and applied electronics
- **Academic Seminars & Presentations**
 - Delivered class seminars in core science subjects
 - Topics spanning **Physics, Biology Mathematics and Chemistry**
- **Posters & Academic Displays**

- Designed and presented academic posters in:
 - Physics
 - Biology
 - Mathematics
 - Chemistry

SEMINARS & WORKSHOPS

- Attended multiple academic seminars related to science and interdisciplinary research
(Details documented in portfolio/academic site)

RESEARCH INTERESTS

- Biophysics and astrobiology
- Mathematical modeling in physical and biological systems
- Computational methods in science
- Interdisciplinary science and technology applications

CAREER GOALS

- Research internships (academic or institutional)
- Preparation for higher studies (M.Sc / Integrated PhD / Research programs)
- Long-term career in scientific research and academia

ADDITIONAL INFORMATION

- Strong interest in scientific communication and academic writing
- Actively building an academic e-portfolio
- Comfortable working independently and in collaborative academic settings
